DETAILED ACTION

Allowable Subject Matter

- 1. Claims 1-22 are allowed.
- 2. The following is an examiner's statement of reasons for allowance: Prior art shows An electrostatically- controllable grating comprising: a plurality of electrically isolated and stationary electrodes disposed on the substrate at least one row of plurality of interconnected actuation elements each actuation element in a row are suspended by corresponding mechanically constrained support region over the substrate by a vertical gap and a mirror element provide on the actuation element.
- 3. However, prior art fails to disclose a mirror defection region connected to the mirror support region and free to be deflected through the mirror gap; and wherein the mirror gap of a corresponding actuation element and is selected to produce a controlled and stable displacement of the actuation region of a corresponding actuation element through a displacement range to a specified point in the actuation gap when an actuation voltage is applied between and actuation region and a corresponding stationary electrode, for diffracting a beam of light incident on the grating as the light beam is reflected from the upper surfaces of the mirror elements. Prior art also fails to show, a displacement range extending to a specified point in the actuation gap when an actuation voltage is applied between the actuation region and the stationary electrode and selected to maintain a substantial planarity and parallelism of the auxiliary element deflection region with the stationary electrode during stable displacement of the actuation region.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karen B Addison whose telephone number is 703-306-5855. The examiner can normally be reached on 8:00 to 4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nestor Ramirez can be reached on 703-308-1317. The fax phone numbers for the organization where this application or proceeding is assigned are 703-305-3431 for regular communications and 703-305-3431 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0956.
